**Energy Saving
Fluorescent
Lighting Products**

F900

The **F900** and **F600 SkyBay High-bay series** is a high-efficient, cost effective choice to replace indoor HID fixtures. These T5 or T8 fixtures will dramatically reduce electrical energy cost and usage - in most cases by over 50%. Can be used in manufacturing plants, warehouses, retail box stores, gymnasiums, arenas, etc. Allows for all types of mounting and offers a variety of options.

F600

The **F500 T5 or T8 Industrial and Strip Fixture Series** are economical and energy efficient, while featuring premium performance and durability. Can be installed using a number of mounting methods. These versatile fixtures can be utilized in simple task lighting up to the most demanding specialized industrial applications. A variety of lengths and options are available.

F500IN

F500ST

F300

F400

F704

**F704
Recessed**

The **F300**, **F400** and **F704 Wrap-around Fixtures** are available in either T5 or T8. They offer an economical narrow or wide profile and are highly efficient, making them one of the most energy-efficient fixtures within the industry. Its high-impact, damage resistant lens and high-efficiency has been found to be an ideally suited replacement or as a new fixture for institutions, hospitals, schools, commercial facilities, etc. A variety of lengths and options are available.

The **F704 Recessed T-Bar Fixture Series** is available in T5. Suitable for new construction or as a replacement fixture. Ideal for retail, office and institutional applications.

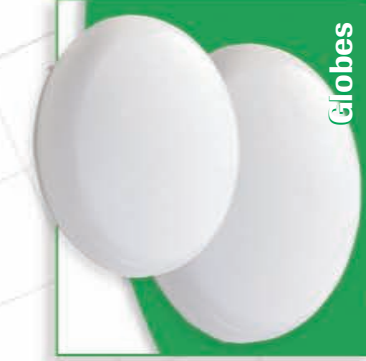

Guardian

The **Guardian-Lite® T5 or T8 Comfort Fixture Series** is an economical, energy-efficient wall mounted bed light. Top and bottom lamps can be individually operated. Ideally suited replacement or as a new fixture for hospitals, medical facilities and extended care facilities.

Vanity

The **FC Compact Fluorescent (CFL) Fixture Series** use less than 25% of the energy used by standard incandescent fixtures and last up to 10 times longer. ENERGY STAR® qualified models are available. Have been utilized in housing projects, hotels, motels, institutions, etc. as an effective means of energy conservation. GFCI receptacle is optional on the Vanity Fixtures.

ENERGY STAR® QUALIFIED PRODUCTS
JAfTech is proud to offer ENERGY STAR® qualified products that save energy and help protect the environment, without sacrificing features or performance.

What is ENERGY STAR®?

Products that earn the ENERGY STAR® use less energy and prevent greenhouse gas emissions by meeting strict energy efficiency guidelines set by the U.S. Environmental Protection Agency and the Department of Energy, and endorsed by the Government of Canada. With energy costs and global warming top-of-mind for consumers, **JAfTech** is committed to offering solutions that help consumers conserve energy and improve the quality of our environment.
